

REMARKS

This is in response to the Office Action of December 9, 2004

Applicant has noted the Examiner's comment regarding U.S. application SN 10/064,304 being 10/064,308. This application is now issued as Pat. 6,715,519 and this fact has been noted by amendment in the application.

The drawings have been objected to under 37 C.F.R. 1.83(a). The computer 40 is shown in the revised drawings. The computer was fully disclosed in applicant's U.S. Patent 6,715,519 which was incorporated by reference in this application. Corrected drawing sheets are attached. Applicant has taken notice of the Examiner's caution and the amended drawing fully complies therewith.

CLAIM REJECTIONS

Claims 1-9 have been rejected under 35 U.S.C. 112 first paragraph as failing to comply with the enablement requirement. Applicant has included the structure that makes up a computer that controls the solenoids 20, 30 and further calculates the weight, speed and placement of product dispensed as described in paragraph 0024. A touch screen is also shown in the amended drawing. The claims have not been rejected on the prior art.

Applicant has made some minor amendments to the specification and claims to more clearly describe the invention.

SUMMARY

The objection in the Office Action covered the drawing and a 35 U.S.C. 112 rejection. Applicant has amended the drawings and the specification to overcome this

rejection. No citation of prior art was noted. Consequently, reconsideration and allowance of this application in its amended form is respectfully requested.

Respectfully submitted,

RICHARD A. JOEL
